Course Date & Location

The course is held at your office at a time convenient for you. The course begins promptly at 0800 and concludes by 1530. All staff, front and back, and Dentist associates are encouraged to attend. The Dentist meets with Dr. Doernbach on the previous evening from 1600 to 2200

Faculty

David Doernbach, Ed.D., received his Doctorate in Adult Education from the University of Arkansas and has been teaching Advanced Life Support methodology ACLS and ATLS for 42 years.

He initiated the first ACLS course at the University of Arkansas Medical School where he held a Clinical Faculty post in the Department of Anesthesiology. He was the first Arkansas coordinator for Advanced Trauma Life Support® (ATLS) with the American College of Surgeons for twenty years.

Dr. Doernbach co-authored the first two editions of : *ECG Workout: Exercises in Arrhythmia Interpretation.* published by JB Lippincott

He was the sole author of *How to Survive ACLS* which was translated into Chinese. Both were published by JB Lippincott.

He authored the DVD “How to Survive ACLS” to make preparing for the ACLS course easier.

Dr. Doernbach has been teaching ACLS for a total of 45 years, initially to Physicians and Nurses, and then to General Dentists and Oral Surgeons as a Certified ACLS Instructor with the American Heart Association.

Course Description

Many Dental Boards require Advanced Cardiac Life Support (ACLS) certification if the Dentist sedate their patients; however, no thought is usually given to the office staff that have little or no experience in performing resuscitation skills should the Dentist have an emergency.

My solution to this problem is Advanced Dental Life Support(TM). I train both the Dentist AND the employees simultaneously. This seminar combines two (2) distinct workshops: Advanced Cardiac Life Support (ACLS) and Dental Office Emergency Preparedness (DOEP).

ACLS is a nationally recognized certification program from the American Heart Association while DOEP is a proprietary workshop that teaches the dentist's office staff to assist him when employing ACLS-level resuscitation equipment and skills to manage office emergencies.

Much of each workshop's lectures and most all of the simulated emergency-participation overlap for both workshops. Although each workshop is independent of the other, combining them through solo and group lectures and simulated emergencies into a 1.5 day seminar, allows the Dentist and office staff to utilize a team to respond to, and manage, in-office emergencies. This skill set requires that everyone, not just the Dentist, know the overall picture and in each has received specialized training in their particular role.

Although the Dentist will be awarded ACLS certification upon successful completion, each staff member will be taught to act with others as a unit....an Emergency Response Team (ERT). With the Dentist as team leader, with each person cross-trained so that they can play any member of the team: CPR compressor, Ventilator, Recorder, Defibrillator, or Medication specialist. Training emphasis will be one-third on cognition and two-thirds on hands-on psychomotor skills through dental and medical emergency simulations.

Staff will be taught to: a) recognize different symptoms of dental emergencies, b) use a systems approach to call for help, c) retrieve the necessary resuscitation equipment, d) correctly position the AED and perform a shock if necessary, e) use teamwork to lift the patient to position a CPR board, f) place a oropharyngeal airway and ventilate with 100% oxygen by Ambu bag, g) assist in placing an intravenous or intraosseous lifeline, h) assist in medication documentation, and I)assemble medication for administration.

In summary, although ACLS certification for the Dentist is the backbone of the course, the DOEP component stresses that staff have to be trained as well to support the Dentist in managing any medical & dental emergencies .

ADLS Course Schedule

0800-0810	Welcome and Introduction
0810-0835	Systems Approach to Emergencies
0835-0850	S/S of Respiratory Emergencies
	Break
0905-0955	Basic techniques in Cardio-Pulmonary arrest.
	Break
1010-1050	AED Instruction and Advanced airway adjuncts
	Break
1100-1115	Medication Dos and Don'ts
1115-1125	Emergency Team Dynamics
	Lunch
1155-1210	Team Dynamics - continued
1210-1305	#1 Dental Emergency simulation
	Break
1310-1405	#2 Dental Emergency simulation
	Beak
1410-1505	#3 Dental Emergency simulation
	Break
1510-1530	Written Exam

Course Prerequisite

The student must have a **current** BLS (CPR) card from the American Heart Association or American Red Cross. If your CPR card was achieved through a different certifying organization, please call 800-844-2257 prior to enrolling to ensure organizational acceptance.

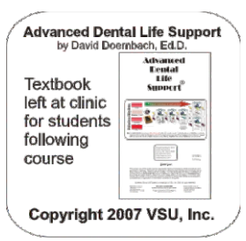
Objectives

Emergency Training for the Dental Office

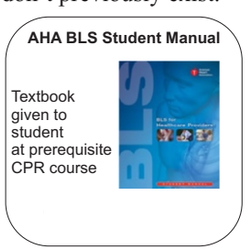
Upon completion of the course, each staff member will be cross-trained in each of the component disciplines of an Emergency Response Team. Guided by the Dentist, the team will respond to emergency requests involving medical resuscitation skills and equipment in a calm, professional manner such that the Dentist's anxiety is held to an absolute minimum and patient care is maximized.

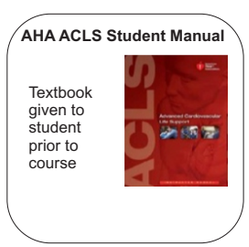
Supplied Materials

The Advanced Dental Life Support® text by Dr. David Doernbach and a set of Resuscitation Team Response Cards are supplied prior to the course.



Both the BLS Student manual and ACLS Student manual will be left at the Dental office if they don't previously exist.





Successful Completion

Successful Completion is predicated on achieving a written test score of 85% AND completion of at least two of the three dental emergency simulations. Upon successful completion, all students will be issued a certificate detailing the objectives gained and the hours earned.

CDE Hours Awarded

PACE ACADEMY of GENERAL DENTISTRY PROGRAM APPROVAL FOR CONTINUING EDUCATION

VSU INC
Nationally Approved PACE Program Provider for FAGD/MAGD credit.
Approval does not imply acceptance by any regulatory authority or AGD endorsement.
12/01/2016 to 11/30/2020
Provider ID# 325237

Successful completion of this activity is acceptable for awarding 6.0 CDE

Teaching Methods

Cognitive instructional methodology consists primarily of lecture and faculty-led discussions in a round-table atmosphere. Psychomotor skills are both practiced and evaluated through the use of manikins in simulated medical-dental emergencies within the office operatories and reception area.

Cost

This course is complimentary when given in conjunction with an on-site ACLS offering for a Dentist. It can be offered as a free-standing educational offering. Please call for monetary details.

Refunds and Cancellation Policy

Call 662-363-69407 to cancel; written confirmation will be sent upon request.

If cancellation occurs before 0800 on the course date, a full refund (if there was a charge for the course) will be awarded. The client is liable for any travel costs by Dr. Doernbach that were incurred prior to cancellation.

If VSU was not notified of the cancellation before the 0800 on the day of the course, there will no refund (if there was a charge for the course). The client is liable for any travel costs incurred by Dr. Doernbach prior to cancellation.

Conflict of Interest Disclaimer:

To make students aware of real or perceived conflicts of interest that relate to this presentation, the following Faculty relate the following:

Donna Harmon, the wife of Dr. Doernbach, does sell emergency equipment including AEDs. However, no support, monetary or otherwise, has been given by any manufacturer to the Program provider.

Dr. Doernbach will only use generic terms when describing any specific emergency equipment during the presentation. In addition, he agrees to refrane from including any discussion of "off-label" use of any commercial product within the presentation.
